

Major Solar Projects in the United States

Operating, Under Construction, or Under Development

Updated August 15, 2014

Overview

This list is for informational purposes only, reflecting projects and completed milestones in the public domain. The information in this list was gathered from public announcements of solar projects in the form of company press releases, news releases, and, in some cases, conversations with individual developers. It is not a comprehensive list of all major solar projects under development. This list may be missing smaller projects that are not publicly announced. Particularly, many smaller projects located outside of California that are built on a short time-scale may be underrepresented on this list. Also, SEIA does not guarantee that every identified project will be built. Like any other industry, market conditions may impact project economics and timelines. SEIA will remove a project if it is publicly announced that it has been cancelled. SEIA actively promotes public policy that minimizes regulatory uncertainty and encourages the accelerated deployment of utility-scale solar power.

This list includes ground-mounted solar power plants 1 MW and larger.

Example Projects

Nevada Solar One

Developer: Acciona
Electricity Purchaser: NV Energy
Location: Boulder City, NV
Technology: Trough
Capacity: 64 MW
Source: Acciona North America

Sierra SunTower

Developer: eSolar
Electricity Purchaser: Southern California Edison
Location: Antelope Valley, CA
Technology: Tower
Capacity: 5 MW
Source: eSolar

Nellis Air Force Base

Developer: MMA Renewable Ventures
Electricity Purchaser: Nellis AFB
Location: Clark County, NV
Technology: PV
Capacity: 14 MW
Source: MMA Renewable Ventures

DeSoto Next Generation Solar Energy Center

Developer: Florida Power & Light Co.
Electricity Purchaser: Florida Power & Light Co.
Location: Arcadia, FL
Technology: PV
Capacity: 25 MW
Source: Florida Power & Light

Major Steps to Bring a Utility-Scale Solar Plant Online

Private versus Public Land

Solar projects proposed on public lands overseen by the federal government must complete a full Environmental Impact Statement before being issued a construction permit by the U.S. Department of the Interior. This review process, which takes as long as four years to complete, involves coordinated analyses by federal, state and local stakeholders to identify the potential impacts of a proposed project.

On June 29th, 2009, Secretary of the Interior Ken Salazar announced "Fast-Track" initiatives for solar projects on lands in the West. Currently, 14 solar projects have received the "Fast-Track" distinction and are undergoing environmental review. The "Fast-Track" initiative goal is to focus BLM efforts on promising projects in order to complete review prior to the December 2010 deadline required to qualify for some funding programs under the American Recovery and Reinvestment Act. For more information on the "Fast-Track" solar projects, please visit: http://www.blm.gov/wo/st/en/prog/energy/renewable_energy/fast-track_renewable.html

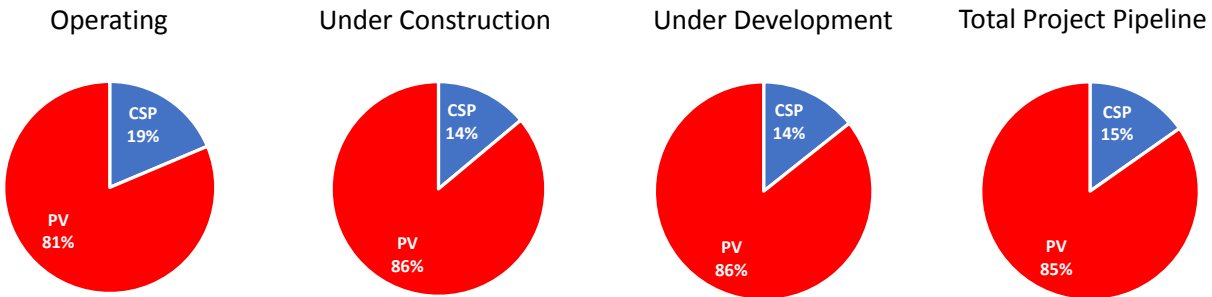

For more information:

Press inquiries should be directed to Ken Johnson (kjohnson@seia.org) or Samantha Page (spage@seia.org)
 If you have comments on this list, please contact research@seia.org.
